

The Children learned about the process of pollination. They did a Cheeto activity on how pollination works. They had cheesy fingers which represented the pollen of a flowers. They were asked to obtain pollen from their flower and pollinate a friend's flower.

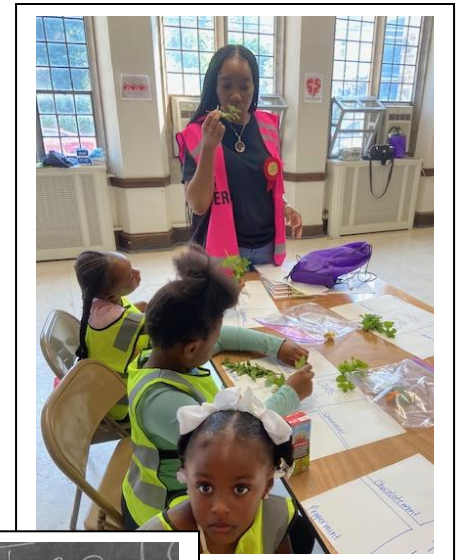

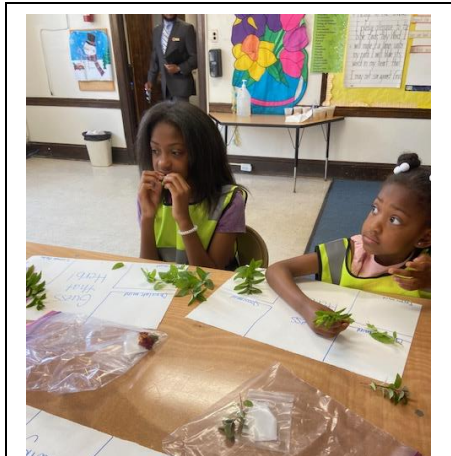

The children were able to observe how Marigold seeds are produced by looking at dried Marigold flowers and using a magnifying glass.

The children were able to taste, Marigold mango tea.

The children were able to observe different herbs, using their taste, smell, touch to identify the herbs and place them correctly on the board.

Finally, the children used the rest of the herbs that was left after the observation to make Marigold tea using the tea bags that was given.
